Cooling Off can only be a 'Wipe' Away

A Look At Cool-Off Towelettes
Product review by Linda Eagleson

Remember those really, really hot days when it was so hot that nothing seemed to work? Sitting in those extra long meetings or walking through the grocery store and not able to get a break from the heat. How about when those nasty 'hot flashes' suddenly appear out of nowhere and trying to cool down is not an option. It might be winter, but summer is always just around the corner.

Extra napkins from Dunkin Donuts stashed in the car's glove compartment to wipe the sweat away doesn't really cool me down.

The manufacturers of a product that will solve those issues, It's 2 Cool, Ltd, has an answer. Their product, Cool-Off, is a handy little towelette that contains "cooling herbs, moisturizing botanicals and essential oils". These ingredients combined together results in a product that leaves the skin feeling very refreshed and remains cool for a good 30 minutes or so.

This product was put together by a family of five that wanted something that would keep us cool AND last a long time. They wanted something that was going to be natural, wasn't sticky, and not offensive to the nose. Repeated tests, data collection and trials made this dream come true. Cool-Off towelettes, created from hard work, determination and wanting something different on the market that practically everyone would like, entered the market with a huge success!

I was happy to try out this product because I am always sweating. If I start to walk just a little fast, I start to sweat. Or, just riding in the car on sunny day, or after a glass of wine, or just walking up and down the stairs, I start to sweat.

I was quite amazed at what this product was able to do for me. When I applied the towelettes to the back of the neck (that's where they suggest to use the towelette), I felt an instant coolness all over my body. I then applied the towelette to my heat soaked body and again, I felt cool all over. The Cool-Off towelette lasted almost 30 minutes for me, providing a very cool and refreshing feeling all over.

The towelettes aren't messy in any way, smell quite pleasant, and aren't full of dreadful chemicals. I plan on taking these neat little towelettes in my purse to always be ready for that moment when I need to cool down quickly, when traveling, doing outdoors activities, or just ordinary housework. They are fantastic!

For more information on where to purchase Cool-Off towelettes, please visit their website at: <http://thequickchill.com>. Stay cool!
