Cool Off |Review

Refreshing Towelette in a Pocket-Sized Packet

COOL OFF is a natural, innovative personal cooling towelette product that renews, refreshes and re-energizes.

COOL OFF is infused with a clean-scented formula of natural ingredients that includes cooling herbs, moisturizing botanicals and therapeutic essential oils.

I jumped at the chance to review **Cool Off** because living in Florida and the heat being as bad as it is I wanted to see if it worked. Guess no more because it did! I got two towelettes to try out and used one on a trip to a theme park and gave the other to my son who works at the theme park. I was super impressed by this product. Not only did it cool me and my daughters down but I was able to revitalize the coolness with a simple splash of water where I had rubbed the towelette previously. This product should be in all stores and theme parks in Florida! It made such a huge difference in how our day was to be cooled down right when we wanted to be and in some cases needed to be. My son loved it during his outdoor shift and said he wants a huge box of it. My entire family loves Cool Off and HIGHLY recommend it to everyone!
